HOW TO UNLOCK NO FLY ZONES USING DJI PILOT

Note: An internet connection is required during steps 1 to 5. Please prepare these in advance if there is likely to be no internet connection in the unlocking area. If you have any questions or problems during the unlocking procedure, please send an email to fliesafe@dji.com

STEP 1

Power on the remote controller and then the aircraft.

STEP 2

Connect your mobile device or CrystalSky to the remote controller, link it to the aircraft, and then launch the DJI Pilot app.

Note: In the DJI Pilot app, make sure you are logged in with the DJI account which was used when submitting your custom unlock request.

STEP 3

In the DJI Pilot app tap on the menu icon in the top right corner. Then tap on NFZ Unlocking Applications.
STEP 4

Refresh the No Fly Zone (NFZ) database by tapping on the Refresh icon in the top right corner. You will get a notification about new unlocking packages. Tap on Details to proceed.

STEP 5

To import the unlocking licenses into the aircraft, tap on Import All.
STEP 6
Activate the unlocking certificates with the toggle, confirm that you are authorized to fly, you accept full responsibility for your flight and that you agree to upload device hardware information.

</tbody>
</table>

STEP 7
Once activated, tap on the button in the bottom left corner to view the map.
A green zone indicates the unlocked area on the map.

Note: You can only fly the aircraft within the green zone while the unlocking certificate is activated. To fly outside the green zone, deactivate the unlocking certificate.
