CustomTerrain.PNG – Custom Terrain Awareness data source synced from Maps Made Easy

MissionPlan.PNG – Mission Plan management allows for easy display, sharing and syncing to Maps Made Easy

MapPilotProFlightLog.png – Flight logs are synced to Maps Made Easy and other service providers for compliance and diagnostics

## **Brief Introduction**

Unlike most of the data collection apps out there, Map Pilot Pro cares about your success since Maps Made Easy processes the data we help collect. Map Pilot Pro is designed to make data collection easy while not letting you make costly mistakes.

Based on 8+ years of DJI flight app experience. Map Pilot Pro helps you create and fly the optimal flight path to create great maps using the Maps Made Easy map processing service. Process into the final product using your own photogrammetry software or our Maps Made Easy online service. Mapping has never been easier.

Advanced features include Terrain Awareness, multiple mission types, Quick Map reviews, custom basemaps, no fly zones display, multi-battery flight management and more.

All flight logs and mission planning can be synced to Maps Made Easy for enhanced debugging and troubleshooting to help users create the best maps available.
